PROFESSIONAL SUMMARY

Data Analyst fresher with a B.E. in Computer Science (AI & ML, 2026, CGPA 8.55). Skilled in SQL, Python, Excel, and Power BI for data cleaning, exploratory data analysis (EDA), data validation, and dashboard reporting. Built end-to-end analytics projects in sales forecasting, customer churn prediction, and data-quality reconciliation. Detail-oriented, analytical, and available to join immediately.

TECHNICAL SKILLS

- **Data Analysis:** Data Cleaning, EDA, Data Validation, Data Quality, Trend Analysis, Statistical Analysis, KPI Reporting
- **Programming & Databases:** SQL, MySQL, PostgreSQL, MongoDB, Python (Pandas, NumPy)
- **Visualization & Tools:** Power BI, Advanced Excel (Pivot Tables, Lookups), Google Sheets, Plotly, Streamlit, Git/GitHub
- **Machine Learning:** Scikit-learn, XGBoost, Time-Series Forecasting, Regression, Classification, Model Evaluation

PROJECTS

MarketPulse Forecasting – AI Sales Forecasting & Business Intelligence

Python, Pandas, Scikit-learn, XGBoost, SARIMAX, Plotly, Streamlit | Live Demo | GitHub

- Built a sales forecasting platform using machine learning and time-series models (XGBoost, SARIMAX) to predict future sales and demand.
- Developed an interactive dashboard with model comparison, explainable AI insights, and automated reporting for business decision-making.

RetainIQ Analytics – Telecom Customer Churn Prediction

Python, Pandas, Scikit-learn, Random Forest, Streamlit | Live Demo | GitHub

- Performed EDA and feature engineering on telecom customer data to identify churn drivers and customer behavior patterns.
- Compared Logistic Regression and Random Forest models using accuracy, precision, recall, and F1-score; delivered an interactive Streamlit analytics dashboard.

DataGuard – Data Quality & Reconciliation Platform

Python, Pandas, SQL, MySQL, Streamlit, Power BI

- Automated data validation checks for missing values, duplicates, and invalid formats across multiple datasets.
- Built reconciliation logic and a KPI dashboard to flag matched, unmatched, and discrepant records for root-cause analysis.

INTERNSHIP

Artificial Intelligence Intern Feb 2025 – May 2025

Teachnook (IIT Roorkee Collaboration)

- Completed an internship in Artificial Intelligence, applying Python and machine learning concepts to data preparation and model development.
- Performed data validation and quality checks against defined requirements and documented findings clearly.
- Collaborated with a cross-functional Agile team on issue resolution while meeting project deadlines.

EDUCATION

B.E., Computer Science Engineering (AI & ML) 2022 – 2026

Finolex Academy of Management and Technology, Ratnagiri (Mumbai University) | CGPA: 8.55 / 10

CERTIFICATIONS

- CompTIA Data+
- IBM Data Analyst Professional Certificate
- IBM SkillsBuild – AI Agent Architect
- GUVI – Python Programming
